Project Name XCOIN4M

WHITEPAPER

PROJECT SUMMARY

Project Name: **XCOIN4M**

Token Name: XCO
Token Symbol: XCO
Token Standard: BEP-20
Blockchain Network: Binance Smart Chain (BSC)
Contract: 0x22a5197640A3fE3ABB4471e000D25eA68fAdCA7d
Verification System: https://bscscan.com/

Token Name: X-Defence NFT
NFT Token Symbol: XDC
Token Standard: BEP-20
Blockchain Network: Binance Smart Chain (BSC)
Contract: 0xbB6D9743639c4DB7f04d364f364C34fEe27159D2
Verification System: https://bscscan.com/

Objectives:
Build a multi-national community to convey the message of environmental protection, develop a multi-platform wallet ecosystem, decentralized social network, and increase income through Social-To-Earn, protect the environment through income from virtual walking (Move-To-Earn), and Entertainment-To-Earn.
Establish a capital fund for renting and planting forests, issue carbon credits, and build a decentralized carbon credit exchange.

Overview:
Project Overview:
While XCO is the main token of the entire project and the expanded ecosystem, users cannot freely access XCO. Initially, XCO can only be obtained by users daily through owning and staking XDC NFTs to mint XCO.
XCO plays a key role in creating a global community united for environmental protection.
We are committed to building a diverse ecosystem, including forest renting and planting, issuing carbon credits, and building a decentralized carbon credit exchange.
Build a multi-platform wallet, decentralized social network, and online entertainment program.

Benefits:

Encourage community participation in environmental protection.
Issue carbon credits and develop a carbon credit exchange to support emission reduction projects.
Build a multi-platform wallet to help users manage XCO and other cryptocurrencies.
Create a decentralized social network to share the message of environmental protection.
Combine NFT virtual walking and walking programs to enhance awareness and environmental protection.
Build healthy online entertainment habits to protect community health.

Technology:
Smart Contract Technology:
Language: Solidity
Standard: BEP-20
Smart contracts are developed to support various features in the ecosystem.

Brief Description of Smart Contracts:
Smart contracts are a form of transaction designed to automatically execute, control, and record legal tasks based on the terms of the contract or agreement. In simple terms, with predefined conditions, a contract runs on the blockchain, ensuring immediate results without the influence of intermediaries. Smart contracts can also automate processes, trigger next actions if conditions are met.

Smart contracts were introduced in 1993 by Nick Szabo, a computer scientist and a lawyer with expertise in cryptography. He also invented the virtual currency "Bitgold" in 1998, 10 years before Bitcoin appeared. According to him, smart contracts are transaction protocols that computers execute based on the contract's terms. He proposed implementing contracts for synthetic assets such as combining bonds and derivatives (options and futures).

Development Plan:
Roadmap:
✧ *Phase 1 (01/2024-03/2024): Community Building*
  ✓ Launch information about the XCOIN4M project
  ✓ Launch NFT XDC Token
  ✓ Launch XCO Token
  ✓ Select suitable countries for market pre-launch
  ✓ Organize events and promotional campaigns.
  ✓ Develop community portal and communication network.

✧ *Phase 2 (03/2024-12/2024): Ecosystem Development*
 - ✓ (03/2024) Listing Pool PancakeSwap.Finance
 - ✓ (02-03/2024) Develop a multi-platform wallet for managing XCO and other cryptocurrencies.
 - ✓ (04/2024) Listing and Trading on CEX Marketplace: MEXC GLOBAL and expanding to other Marketplaces
 - ✓ (05/2024) Develop NFT walking and reward programs
 - ✓ (06/2024) Build an online entertainment and reward program
 - ✓ (07/2024~12/2024) Launch decentralized social network

✧ *Phase 3 (01/2025 ~ 12/2026): Develop a community economic model*
 - ✓ Rent and plant forests and implement environmental protection projects.
 - ✓ Build a carbon credit exchange (expected to start in 09/2025)

Marketing and Community Plan:
Marketing Strategy:
Use social media channels and advertising campaigns to enhance awareness, including major social networks such as Facebook, Twitter, and self-built media channels.
Collaborate with environmental protection organizations.

Community:
Organize events and promotional programs to enhance community interaction.
Build a marketing partnership strategy to quickly create a large and active community.

Token Economics:

NFT XDC :

NFT	Total numbers	XCO Reward equal to USDT per Day	Period
NFT X STANDARD	25,000	0.60	333
NFT X BRONZE	5,000	3.25	308
NFT X SILVER	2,500	7.00	286
NFT X GOLD	1,000	18.75	267
NFT X TITANIUM	500	40.00	250

NFT X PLATINUM	400	85.00	235
NFT X DIAMOND	300	180.00	222
NFT X BLACK DIAMOND	200	475.00	211
NFT X CROWN DIAMOND	100	1,000.00	200

Token XCO
Total Supply: 100,000,000 XCO
Starting Price : 0.1 USDT
Community Allocation : 20%
Ecosystem : 20%
Fund burned according to Smart Contract : 30%
Automatic buyback & burn mechanism : 20%
Marketing and Airdrop : 5%
Dev. Team : 5%

Security:
Security of Smart Contracts on the Blockchain Platform:
Use advanced security measures to ensure the safety of users and assets.

Conclusion:
We hope that the XCOIN4M project with NFT XDC and XCO Token is not only a financial tool but also a source of motivation for everyone to join the international community with a mission to protect the environment.
Let's together build a sustainable and clean future!
